

Q~VATOR

The Q~VATOR III SERIES ROPS has been designed to accommodate excavators up to 30,000kgs

The VATOR is light weight, easy to install and has been destructively tested and certified to ISO 12117-2 & ISO 10262.

The VATOR series has a fully integrated OPG to guard and or OPG gate component to allow for optimised visibility and ease of access whilst maintaining the aesthetics of the machine geometry.

The VATOR is fully mine compliant and has been designed to allow for the localised fitting of the Q~ROPS Optional Mine Attachment Kit.
